

Feedback of AVV students after debate on PGD on 6th April 2011

With MOSSLANDS High School , UK

And Mr. Egbert Weisheit, a subject expert from Germany

- It was a highly informative session as we learnt a lot about Pre-implantation Genetic Diagnosis(PGD). In addition, we also came to know about the inhibitions in Germany related to PGD. -Kshitij**Male**

- The topic for the debate was on a very interesting subject and we could have talked more on it. We learnt a lot and got introduced to a different view points as we even talked to an subject expert, Mr. Egbert Weisheit. – Gouri L. **Female**

- The topic was very interesting and highly debatable. It was fun racking my brains on ethical issues on PGD. The students at Mosslands were also very enthusiastic. –Aastha**Female**

- The debate was a good learning experience on a current and an interesting topic of PGD. It was very enlightening to hear the views of Mr. Egbert from Germany. The questions asked were also quite probing in nature. We got a chance to present our viewpoints on the issue and we strongly support PGD but only if the parents suffer from genetic disorders. The video shown was quite supportive and encouraging in favour of PGD, we got to know the real life experience. Just wish it could have been a little longer as it was quite an interesting topic. - DarshilShastri**Male**

- The experience with the students of Mosslands was truly enriching. The expert from Germany(Egbert)helped us form a distinct opinion on the topic. - Archit**Male**
