

# A Grand Bedroom

Your task is to design your own bedroom. You have £1000 to spend but you cannot spend a penny more!

First you will need to measure your room and do a scale drawing.

You need to work out how much paint and wallpaper you need and how much it will cost.

Do you want carpet or a wooden floor? How much will it cost?

What furniture would you like in your room? Compare the prices from different retailers.

If you have any money left what luxuries are you going to spend it on?

If you need any help you can ask your maths teacher.
